Student – Rs. 6000
Consultant – RS. 8000

RADIOLOGICAL INSTITUTE FOR TECHNICAL ASSISTANCE

These are online interactive webinars which have different protocols than regular webinars, wherein hands on experience is given to the delegates by live discussion on cases. The platform is unique and the participant delegates can ask questions to the faculties during the presentation and Interactive case presentation.

..UNIQUE ASPECT OF THE WEBINAR..

- The delegates are given about 10 to 20 relevant and very interesting cases before the webinar and are supposed to see the cases and keep the findings at hands during the webinar.
- The faculties give detailed presentation showing the anatomy with help of images with different sequences on MRI/ on CT with different phases and then various common pathologies are discussed and shown on images.
- During the presentation, spot diagnosis slides are put to make delegates understand the subject totally, to make sure that they understood the anatomy and the pathology.
- Then the faculty runs through the cases in interactive way as each delegate takes up a case provided to them and shares the findings and then the faculty will further describe the findings to the delegate and explain in detail the pathology.
- This is the unique way of taking an interactive webinar and hence the delegates will be benefited to the maximum extent,
- The delegates also have chance to ask their queries during and before end of webinar
- Best unique platform is given for the webinar which was appreciated tremendously by previous webinar delegates and faculties and gave me inspiration to continue doing such webinars in lockdown time and continue on my path of education and universal health.
- Best experienced faculties take webinar.

..AIM OF THE WHOLE INTERACTIVE WEBINAR..

- To make the delegates, those who are already reporting, will become best in reporting, those who are starting the reporting will be able to do more confidently and also give better reports.
- On the whole radiology fraternity will reach another higher milestone to give best diagnosis and then best treatment and hence best universal health.
